Skills

- JavaScript
 - TypeScript
 - CSS3
 - Bootstrap
 - React
 - Figma
 - Node.js
 - MySQL
 - Express
 - Docker
 - Git
 - Terminal
-

Experience

Deep Dive Coding

10/2021 - 12/2021
Deep Dive Coding
Remote

Attended Deep Dive Coding bootcamp full time (50 to 60 hours per week for 10 weeks). Learned fundamentals of coding to create dynamic websites, as well as collaborating with colleagues to make them quick, responsive, and UX/UI friendly.

06/2020 - 10/2021 - **Environmental Services Lead** - Northwest Texas Healthcare, Amarillo, TX

10/2015 - 10/2018 - **Kitchen Manager** - Chipotle Mexican Grill, Phoenix, AZ

Projects

Personal Website - My personal website was created using Bootstrap with some CSS3 rules overriding. I used JavaScript, Node.js, and Express to make the form fully functional, and I packaged everything with Docker.

ForkIt! - ForkIt! was a group project made using React, Bootstrap and JavaScript to tie the frontend together. TypeScript, MySQL, Node.js, and Express were used to create the backend, with Docker to containerize it. The result was a quick, responsive, dynamic website that serves a fun and hassle-free purpose.

Education

05/2011 Scottsdale,
AZ

General Studies
Saguaro High School
